

Physical Education Intent Statement

Intent

At Oasis Academy New Oak, we recognise the importance of Physical Education (P.E.) to provide pupils from Reception to Year 6 with a broad range of physical activities that help them to develop competence, health, fitness and wellbeing. We intend to offer an enjoyable, high quality physical education curriculum which encourages all pupils to compete, experience success and develop resilience while participating in a range of sports and outside adventurous activities. Our intention is to ensure that able, active and sporty children are stretched to improve their skills and performance, as well as supporting less able and reluctant pupils to be healthy, fit and active. Opportunities to compete against other pupils within and between different schools help to build character and embed Academy Habits such as forgiveness, hope and honesty.

Implementation

Pupils, from Year R to Year 6, are taught regularly, by teachers using a range of planning resources to support the delivery of each of the National Curriculum programmes of study. Sports instructors enable targeted differentiation in PE lessons, applying their expertise to develop the confidence and competence of the more and less able. The curriculum is further enhanced by participation in numerous sporting tournaments with other schools in the area and after school clubs. We have provided a core provision of swimming for Year 3 pupils, with further catch up sessions for Years 4-6. We follow the guidelines set by the national curriculum to ensure we offer a range of PE activities that allow each child to feel challenged and offer opportunities to progress further, including opportunities for outside adventurous activities both within school and while at year group camps.

Sports activities at lunchtime, both instructor lead and staff supervised also help to encourage sustained activity and promote active and healthy lives.

Impact

The impact of this curricular provision will be that by the end of each key stage, pupils are expected to know, apply and understand the matters, skills and processes specified in the relevant programmes of study. Each term, teachers will be able to reflect on pupils' increased confidence, ability and activeness and, working with sport coaches, adapt their teaching and differentiation accordingly to best support all children across the whole of the PE curriculum. All pupils will be seen to be more active, enjoy taking part in a variety of physical activities and have developed resilience to continue to engage in competitive sports.
