Answer the questions below.

The Mole had been working very hard all the morning, spring-cleaning his little home. First with brooms, then with dusters; then on ladders and steps and chairs, with a brush and a pail of whitewash; till he had dust in his throat and eyes, and splashes of whitewash all over his black fur, and an aching back and weary arms. Spring was moving in the air above and in the earth below and around him, penetrating even his dark and lowly little house with its spirit of divine discontent and longing. It was small wonder, then, that he suddenly flung down his brush on the floor, said, "Bother!" and "O blow!" and also "Hang spring-cleaning!" and bolted out of the house without even waiting to put on his coat. Something up above was calling him imperiously, and he made for the steep little tunnel which answered in his case to the gravelled carriage-drive owned by animals whose residences are nearer to the sun and air. So he scraped and scratched and scrabbled and scrooged, and then he scrooged again and scrabbled and scratched and scraped, working busily with his little paws and muttering to himself, "Up we go! Up we go!" till at last, pop! His snout came out into the sunlight and he found himself rolling in the warm grass of a great meadow.

Try solving these word problems. Remember, read the question carefully.

Draw parts of the questions out or use a bar model to help you. I've started the first one for you...

For each word problem, underline the key information, write down the calculations and write out the answers. The problems may involve adding, subtracting, multiplying or dividing.

1. On Sunday I spent 98 minutes on my art project and 35 minutes on my numeracy homework. On Thursday evening I spent a total of 100 minutes on my homework. What is the difference between the amount of homework I did on Sunday and Thursday evening?

$$\text{Sunday} = 98 + 35$$

$$\text{Thursday Evening} = 100$$

What is the difference? I remember, this means subtract!

$$\text{Sunday} - \text{Thursday} =$$

2. Dad drives a truck. Last week he drove 250 miles on Monday and 145 miles on Tuesday. This week Dad drove 150 miles in total. What is the difference in mileage between this week and last week?

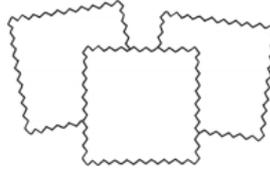

3. One watch costs 35p and I bought two. If I paid with a £5 note, how much change did I receive?

4. I need to buy enough whiteboards for 95 students and there are 10 in a pack. When the packs arrive, 4 whiteboards are damaged. How many whiteboards are undamaged?

$$\begin{array}{r} 512 \\ + 145 \\ \hline 657 \end{array}$$

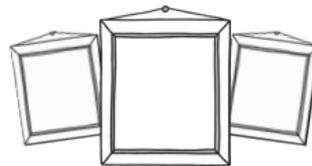

5. At the fabric shop I bought 125 metres of orange fabric and 50 metres of yellow fabric. I have used 13 metres of the orange fabric and 12 metres of yellow fabric. How many metres of fabric do I have left in total?

6. I got £35.00 for my birthday. I spent £10.00 on Saturday and £15.50 on Sunday. How much spending money have I got left?

7. Sally bought 3 photograph frames, each costing £2.50. She paid with £20.00. How much change did she get?
